

Table 5

ANALYSIS OF VOTES BY PARLIAMENTARY CONSTITUENCY

This Table analyses the votes (using “Averaged Data” votes, as explained in the introduction to Table 4) in Parliamentary Constituencies. Due to the frequency of unopposed returns, a column of the Table indicates how many wards were contested. The lower the number of contested elections, so the reliability of the analysis showing the true political “mood” in a constituency decreases. T’out is for the contested wards.
